Silphium laciniatum, Compass Plant

For current pricing, availability, and information on our full installation and management services, visit stantecnativeplantnursery.com

MESIC-TO-DRY PRAIRIE

This is a broad-spectrum prairie grass, sedge, and wildflower seed mix for sites with full sun and medium-to-dry soils. The height profile is more varied than the Low-Profile Prairie seed mix, with species ranging from short to tall. This profile creates a more diverse habitat, offering a variety of cover and food options for wildlife. This seed mix includes at least 6 of 7 native permanent grass and sedge species and 27 of 33 native forb species. Apply at a rate of 42.63 PLS pounds per acre.
